Cadenza

High-Performance Media Furniture

INTRODUCING Cadenza

OUR FINEST MEDIA FURNITURE

Inspired by designers and approved by audiophiles, the **SANUS Cadenza Collection** is our highest performing media furniture yet. At first glance you'll notice expert craftsmanship and beautiful finishes. Look closer and discover a fully featured rack with plenty of space for all your media gear and sound bars, hidden compartments, vented shelves, and many more features that put the **Cadenza Collection** in a category all its own.

The **Cadenza Collection** was developed by professional AV integrators and designers who understand high-performance AV systems and premium furniture. Loaded with top-of-the-line features, **Cadenza** out-performs all other media furniture. Period.

Designed for high-end electronics

Give your electronics the environment they need for optimal performance. **Cadenza** media furniture is built for top-of-the-line electronics and soundbars with wide, extra-large shelves, built-in cable management channels and hidden compartments. **Cadenza** is even compatible with the SANUS EcoSystem™ for a single low-voltage power solution without the mess of excess cables.

Easy Access to Components

Cadenza furniture is designed for ease of use. Accessing your equipment is no exception. You'll love the rack mounting for easy component replacement and removable back panels that provide quick access to the back of media gear for maintenance or AV cable hookups.

Built-in Ventilation

Overheated media gear is no good. That's why **Cadenza** furniture features built-in ventilation and the ability to add cooling fans, keeping your gear cool and running strong. Vents can be found on all internal shelves. Doors are interchangeable, so you can switch from solid wood to open metal mesh for an extra breezy atmosphere that won't stifle sound transmission.

Installer Tip:

Combine any **Cadenza Collection** piece with the SANUS EcoSystem™ for an easy, single power source solution for all your low-voltage power needs.
