

NEW FOUNDATIONS® COMPONENT 100 SERIES 44U AV RACK

MODEL CFR144

A New AV Rack Offering the Ultimate in Convenience

Introducing the CFR144 AV rack, the newest addition to the SANUS® Foundations Component 100 Series. The CFR144 comes pre-assembled with blanking panels and shelves, offering convenience and flexibility. With its lockable tempered-glass door, the CFR144 encloses AV gear while maintaining visibility, and removable side and back panels make it easy to access components and wiring. A unique convection cooling system ensures the CFR144 always keeps AV gear at the perfect temperature by allowing heated air to escape through the top and drawing in cooler air through the bottom. The CFR144 features swivel casters and adjustable feet for the best of both worlds — stable positioning and mobility.

CFR144 assembly detail shown

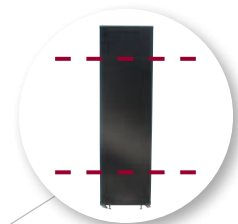

Unique convection cooling system allows heated air to escape through top as cooler air is drawn in through bottom, keeping AV gear at the proper temperature

Lockable tempered-glass door with quarter-turn handle encloses gear while maintaining visibility

Comes pre-assembled with shelves and blanking panels for the ultimate in quality and flexibility

Three section back panel with wire management openings and removable panels for maximum wire capacity

Removable side allows complete and total access to components and wiring

Swivel casters and adjustable feet allow stable positioning and mobility
