

# NEW SANUS FOUNDATIONS® Euro Series Furniture

MODEL EFAP21

## Introducing the New Euro Series Pull Out Base for AV Racks

New to the SANUS Foundations Euro Series, the EFAP21 pull out base brings the convenience of an AV rack to a whole new level. With the ability to pull out 21" from its home position and swivel up to 90° in either direction, the base ensures the back of AV components are easily accessed. The EFAP21 easily attaches into an opening within a wall or stable cabinet or on the floor and features a modular design that allows you to create a rack that is customized to fit your needs — simply add the EFAS audio expansion shelves and select Euro Series accessories. Its solid steel and MDF construction provides strength and support while the open architecture design allows AV components to maintain optimal operating temperatures.

EFAP21-B1 shown

Open architecture allows unrestricted airflow to maintain optimal operating temperatures for AV components

Modular design works with the EFAS audio expansion shelves and Euro Series accessories for a fully customizable rack solution

MODEL EFAP21
