\* Mounts are compatible with all VESA standard patterns for flat-panel monitors and TVs

### **Mount Compatibility** / TV HOLE PATTERNS

SANUS wall mount products are compatible with virtually every television on the market. Television manufacturers use two different standards when designing the backs of their TVs to allow them to be mounted.

### VESA

VESA is a standard that dictates the exact placement of the holes on the back of a TV. Typically, LCD flat-panel TVs follow VESA standards. There are several sizes of TVs and mounts within the VESA standards (75 mm x 75 mm; 100 mm x 100 mm; etc.) When purchasing a TV that follows VESA guidelines, it is important to choose a mount that uses the same VESA standard as the TV. The other critical element in choosing the right mount is to compare the weight of the TV to the weight rating of the mount.

### RANDOM

The second concept is not really a "standard" at all. Rather, TV manufacturers who do not follow the VESA standards place their mounting holes on the backs of their TVs in non-conforming places. For these TVs, the SANUS brand makes "universal" mounts. This means there are brackets that can be adjusted back and forth to properly align with many mounting holes. When mounting a TV with a random hole pattern, in addition to choosing a "universal" mount, it is also critical to compare the weight of the TV to the weight rating of the mount.
