

NEW FOUNDATIONS® COMPONENT 100 SERIES AV RACKS

Introducing new fully-loaded AV rack solutions

New Sanus Foundations® Component 100 Series AV rack solutions come pre-assembled with shelves and blanking panels to simplify ordering, giving you the ultimate in quality and flexibility. These solid racks offer locking doors, removable side and back panels and Sanus' exclusive convection cooling system, which allows heated air to escape through the top of the rack while cool air is drawn in from the bottom, keeping AV components at the proper temperature. Add-on accessories are also available, allowing you to create a complete rack perfect for your unique installation.

CR11 27-B1 vent detail shown

Convection cooling system allows heated air to escape through top vents as cooler air is drawn in through bottom, keeping AV gear at the proper temperature

Removable side and back panels allow complete and total access to components and wiring

Lockable tempered-glass door with quarter-turn handle encloses gear while maintaining visibility

Swivel casters and adjustable feet allow stable positioning and mobility
