

NEW AV FOUNDATIONS™ DESIGNER SERIES

Sleek, stylish Designer Series furniture is the newest addition to the AV Foundations family

The new Designer Series lives up to its name: these elegant AV stands were created exclusively for Sanus by renowned industrial design firm Cramer Studio. Each piece features an innovative construction of rich, mocha-finished hardwood and smoked tempered glass. This unique design gives AV gear an enclosed look without blocking infrared remote controls. Sanus' convection cooling system maximizes performance by keeping AV gear cool even in enclosed cabinets. And because the Designer Series was created to handle large AV components, both pieces feature steel back panels that can be removed individually for additional depth, or to allow easy cabling and maintenance.

models DFV49 and DFAV30 shown

Smoked tempered-glass gives AV gear an enclosed look without interfering with infrared remote controls, even through closed doors

Spacious shelves designed to accommodate even the largest AV gear

Back panels can be removed individually for easy maintenance and to allow for additional depth

DFV49

Rich mocha-finished hardwood legs

NEW AV FOUNDATIONS™ DESIGNER SERIES
