

NEW SANUS® ELEMENTS™ IN-WALL LOW VOLTAGE BOX

Innovative in-wall system routes cables through wall for a flawless installation

The Sanus Elements™ ELM803 in-wall low voltage box helps to position thin flat-panel TVs as flush with the wall as possible, offering 56 cubic inches of space to hold cables and create a clean cavity in the wall. Great for use behind mounts with or without ClickFit™ compatibility, the ELM803 features cable routing holes and single-gang low voltage pass-through inlet/outlet knockouts for the ultimate in convenience. Simply fit the in-wall box into an opening behind any wall-mounted TV to route cables and wires into the wall for a seamless appearance.

ELM803-B1 shown in use with VisionMount® model LT25

Great accompaniment to Sanus mounts with or without ClickFit™ compatibility

Cable tie-downs allow cables and wires to be secured inside box or routed to specific openings

Offers 56 cubic inches of space to hold cables and create a clean cavity in wall for use with ultra-low profile mounts

Recessed in-wall box features cable routing holes and single-gang low voltage pass-through inlet/outlet knockouts

Simply fit in-wall box into clean opening behind any wall-mounted TV
