MODEL DFAV230

MODEL DFV50

## SANUS introduces new pieces to the Designer Series furniture line

The DFV50 widescreen lowboy and DFAV230 AV component stand are the newest additions to the Foundations Designer Series AV furniture line. Both pieces feature a stylish design that combines hardwood legs with smoked tempered-glass doors. Spacious shelves and generous cable management channels support large AV systems, and removable back panels make component maintenance easy as well as allow for additional shelf depth. The DFV50 and DFAV230 also feature a unique convection cooling system — heated air escapes through the top as cooler air is drawn in through the bottom, ensuring AV gear always stays at the perfect temperature.

DFV50 shown

Two spacious shelves designed to accommodate even the largest AV gear

Compatible with the FMK056 mount kit for a pillar mounted solution (DFV50 only)

Generous cable management channel conceals and routes wires and cables behind furniture

Compatible with the ELM701 anti-tip strap for added safety

Unique convection cooling system allows heated air to escape through top as cooler air is drawn in through bottom

Removable back panels for easy maintenance and additional depth

Hardwood legs and smoked tempered-glass doors give AV gear an enclosed look without interfering with infrared remote controls
